EDUCATION

Bachelor of Technology (CSE)
Galgotias University

07/2019 - 05/2023   Greater Noida

Courses
- Computer science

Senior Secondary
HS Roni inter college

04/2017 - 03/2019

Courses
- Science

WORK EXPERIENCE

Software Engineer
XAutomation Labs Pvt. Ltd

01/2024 - Present   Noida, India

Technology services/product company where I worked on web application development and feature delivery.

Achievements/Tasks
- Built and maintained **responsive UI screens** using **React** and **Material UI** , following reusable component patterns.
- Integrated frontend with **REST APIs** using **Axios/Fetch**; handled **loading, error states, and validations**.
- Fixed UI issues and improved UX by optimizing component rendering.

Software Developer
DRDO (DEAL)

04/2023 - 12/2023   Delhi, India

Government R&D organization (defence), internal tools

Achievements/Tasks
- Contributed to development of an internal application for **Information Security Audit** data collection and analysis.
- Helped design and implement modules to store audit records and support structured reporting.
- Coordinated with mentors to test features and ensure correct handling of sensitive data.

SKILLS

React | Javascript | Material UI | HTML5 | CSS3 | REST APIs | Axios/Fetch | Git/GitHub | Node.js | Express | MongoDB

PERSONAL PROJECTS

E-Commerce Web App | React, Material UI, REST APIs | GitHub | Live
- Developed responsive UI for product listing, product details, and cart using reusable React components.
- Implemented search/filter/sort and client-side state handling for cart and user actions.
- Integrated REST APIs for product data; handled loading/error states and edge cases.
- Added form validations and clean UX patterns (toasts, empty states, etc.).

Real-time Chat App (Chat UI + Backend)
- Built a responsive **chat UI** with conversation list, message thread, message composer, and mobile-first layout.
- Implemented **real-time messaging** using **Socket.io/WebSockets** with rooms for 1–1 chats and group chats.
- Developed backend APIs for **authentication (JWT)**, user profiles, conversations, message history, and pagination.
- Stored messages and chat metadata in **MongoDB**, using indexes for fast message retrieval and latest-chat sorting.
